3-Edit resident

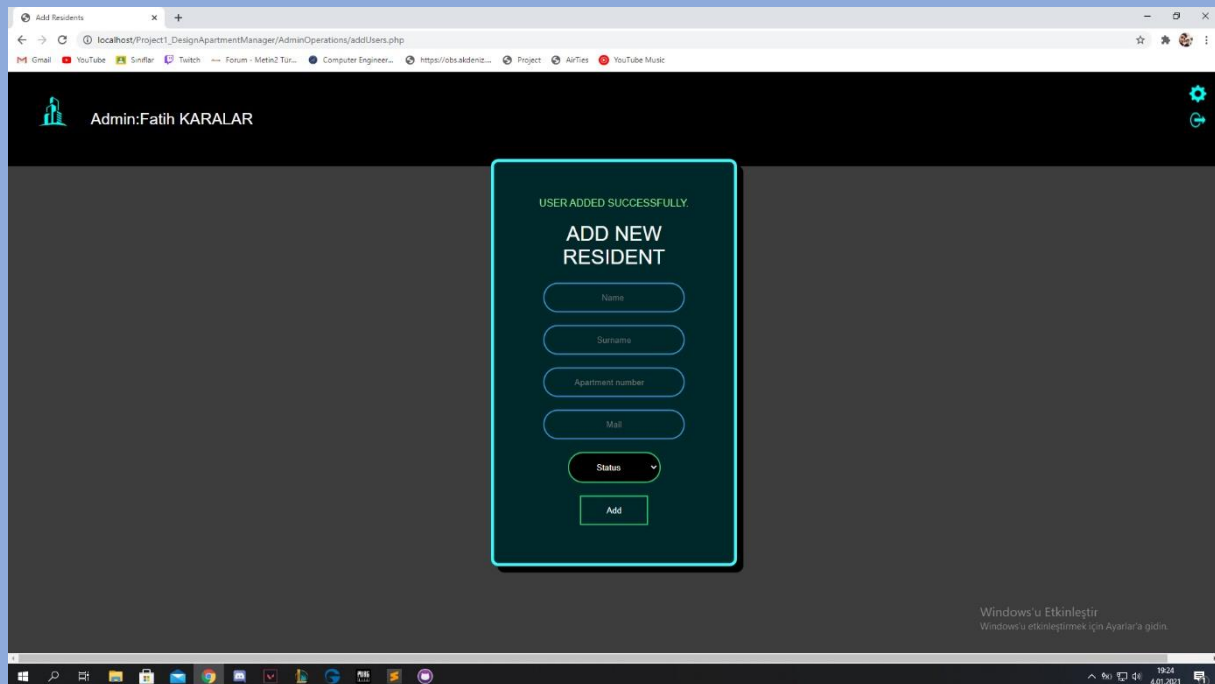

Admin can edit the resident informations, can change the apartment number of resident if the number is not used by another resident.

4-Adding new residents

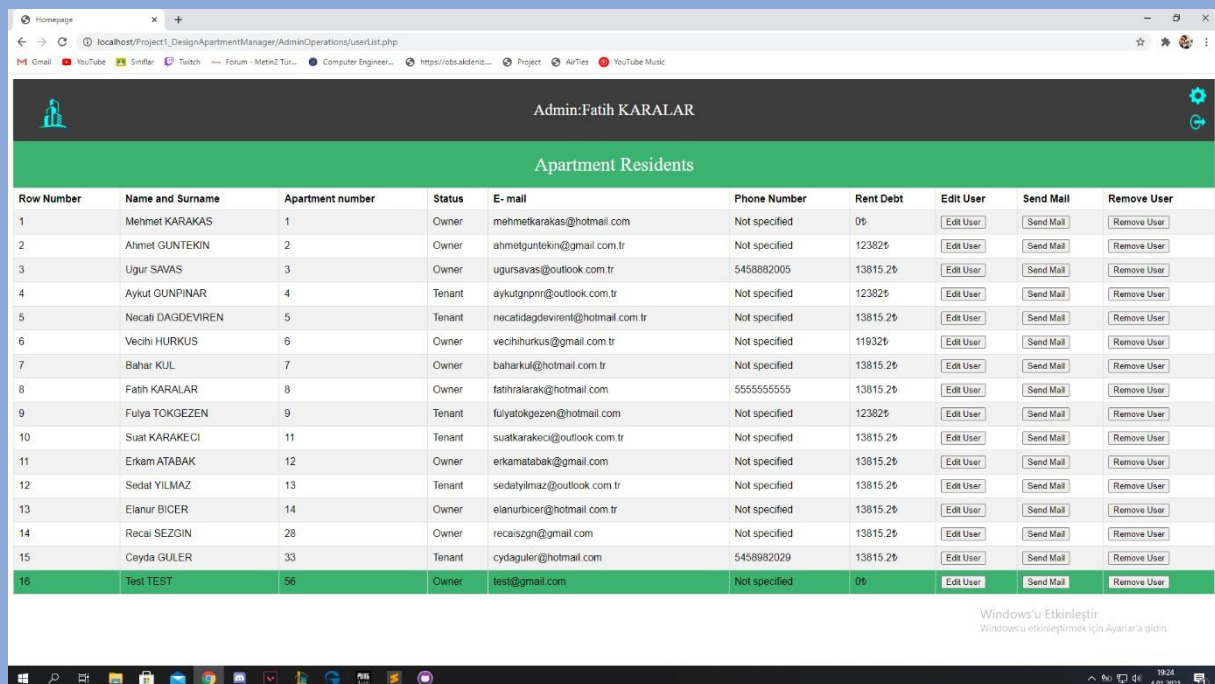

Admin can add new residents to the apartment if the resident does not exist in the apartment. If the apartment number is used by another

resident,admin can not add new resident using used apartment number.Also the e-mail address must be correct type.Otherwise admin will see the “Invalid e mail address” error.

If the resident added,admin will see the success message.

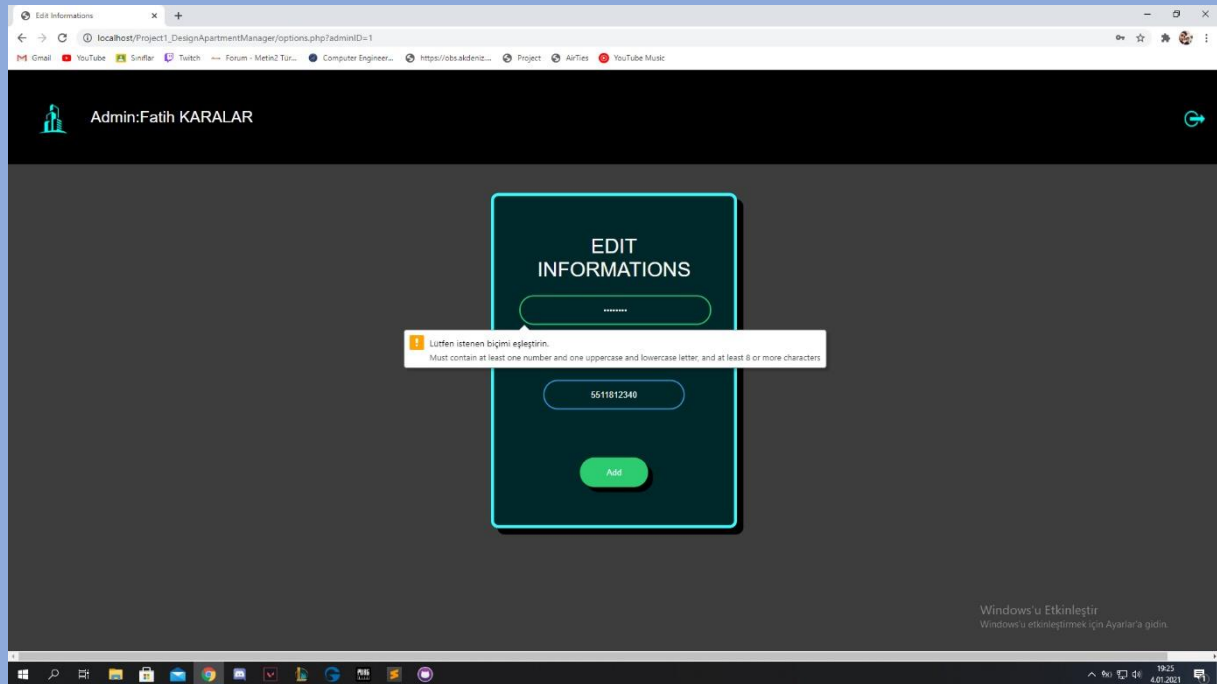

Userlist will updated dynamically when a resident added to the apartment.

Default username: name and surname of resident(fatihkaralar)

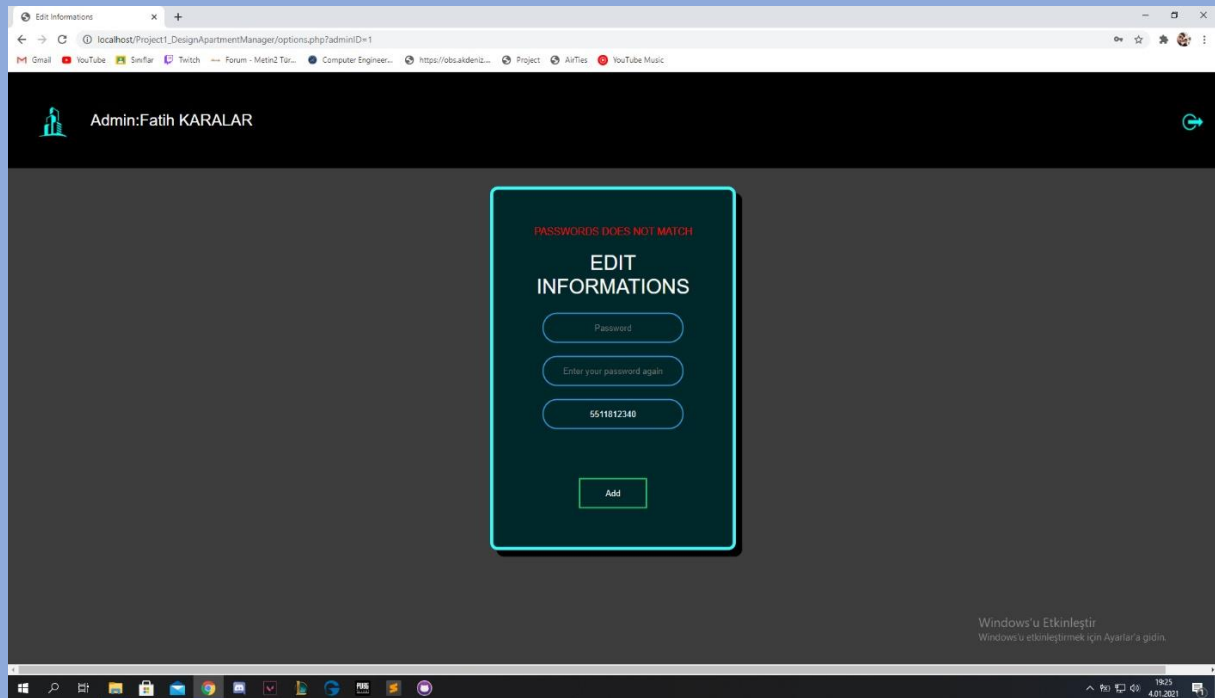

Default password: surname of resident(karalar)

The residents can change their passwords using this informations.

5-Admins can edit their own informations

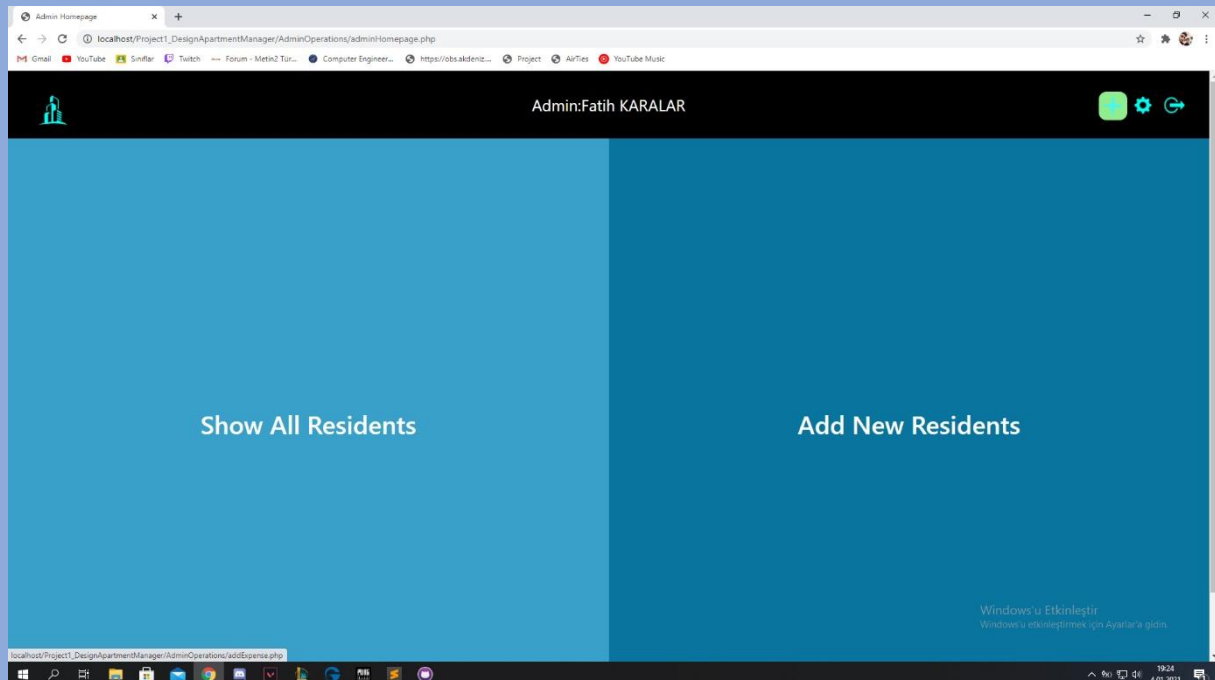

Admins can edit their own informations.They can change their passwords.They must enter new password 2 times and these passwords must be the same.Also the passwords must contain at least one number and one uppercase letter and lowercase letter,also it must contains 8 or more characters for security.Admins can change their phone number if the number does not exists in the database.Also the phone number format must be valid.

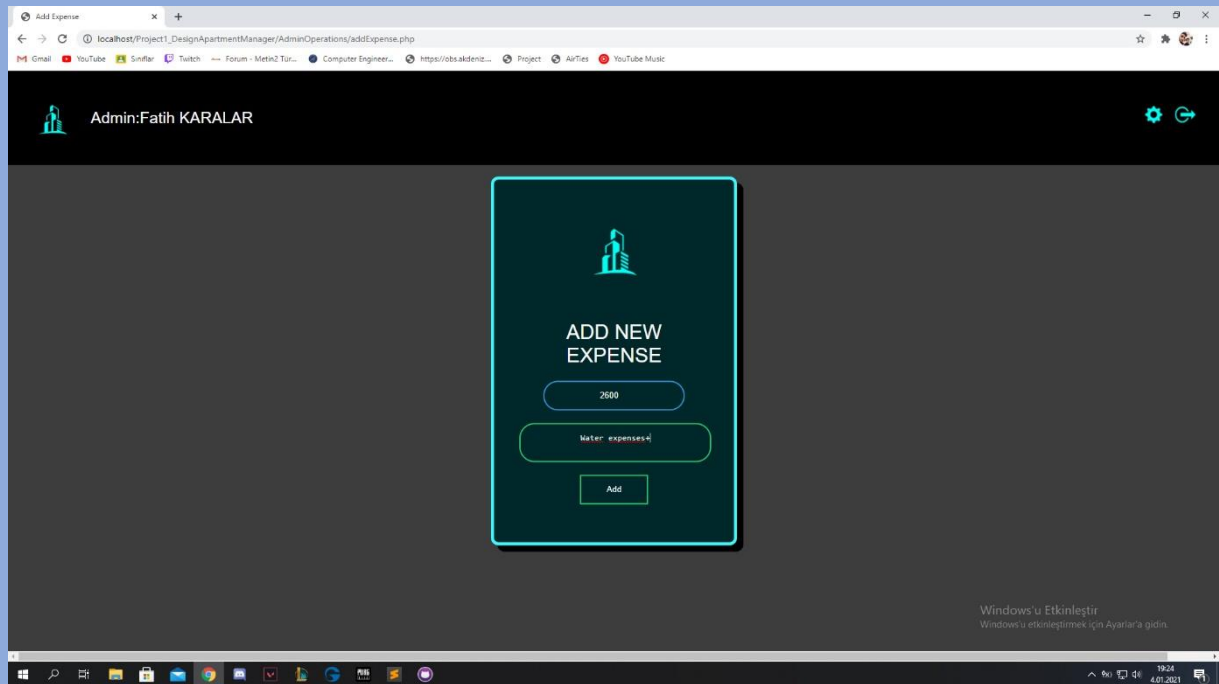

If the passwords are not the same, the admin will see an error message like this.

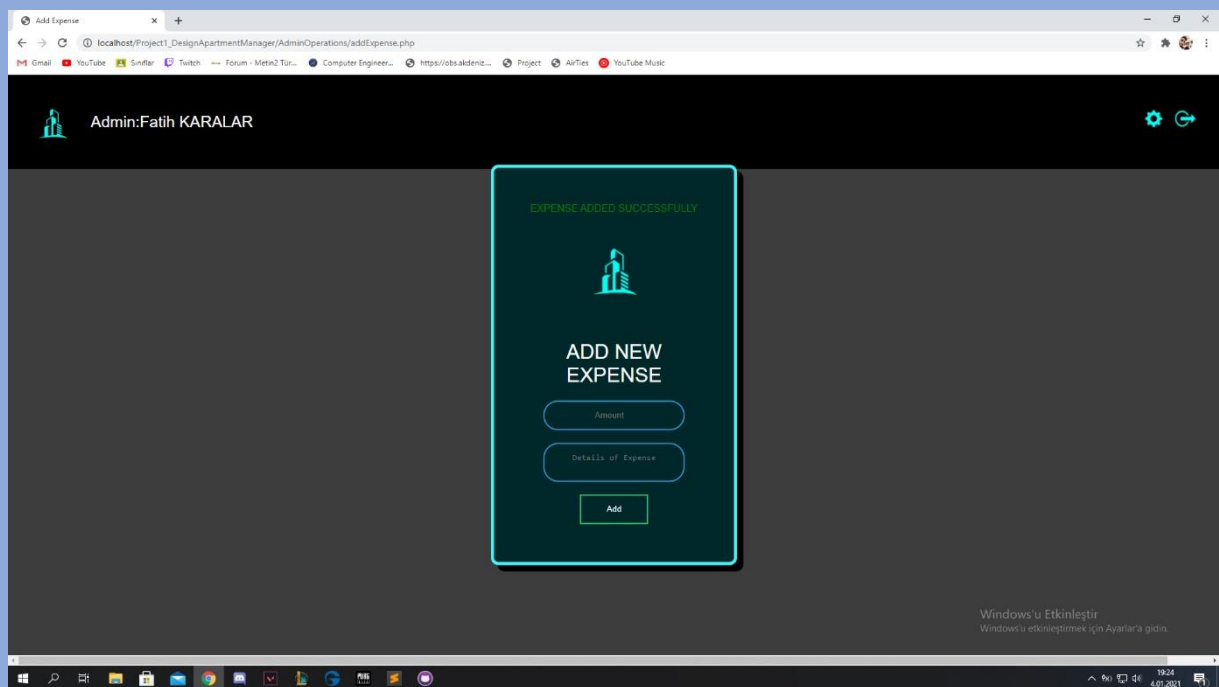

6-Admins can add new expenses and details

Admins can access the add expense page using this button.

In the add expense page,admin can enter an expense amount and it's details.And this amount is divided by the number of residents and added to their debt.For example the admin enter 2000 dollars as elevator maintenance,if the apartment has 20 residents, the debt of each resident increases by 100 dollars.Also the amount of expense can not be negative.

And if expense added successfully,the admin will see a message like this.

11	Fatih KARALAR	5511812340	2600₺	Water expenses	2021/01/04

The Windows taskbar is visible at the bottom.

The residents can see the all expenses of the apartment and their amounts,dates,details and admins who added the expense.When an admin add a new expense this list will be updated dynamically.

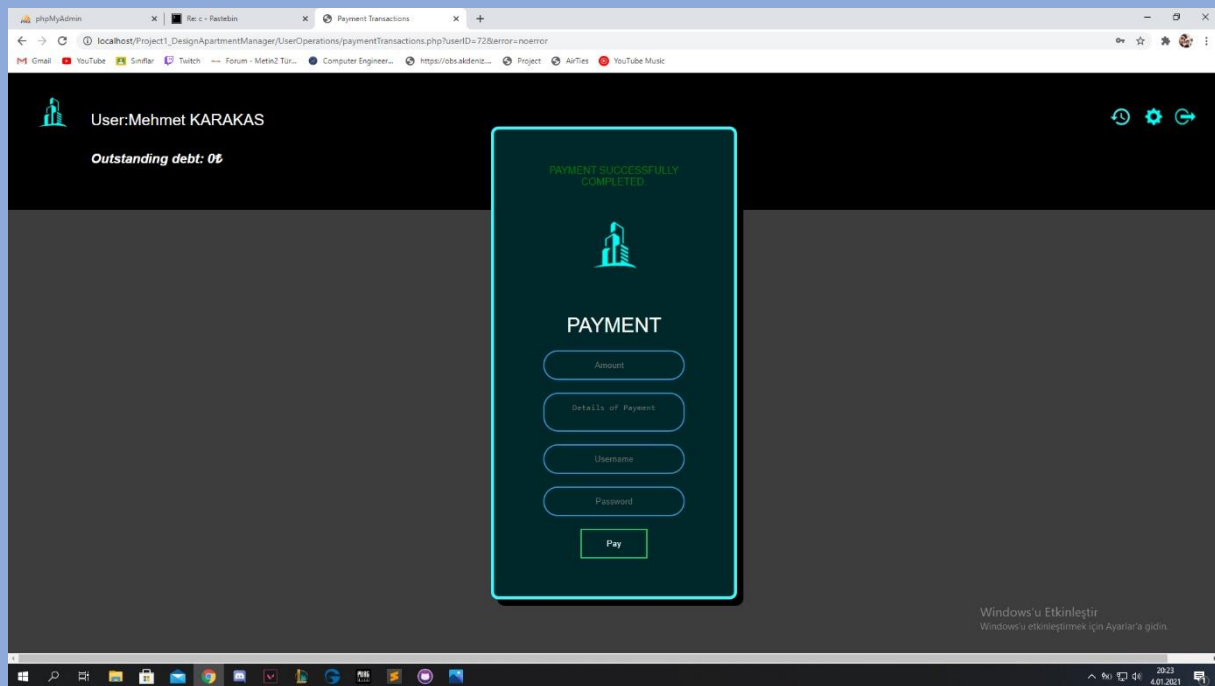

5-Resident can pay their debts

The screenshot shows a web application interface for a resident named Mehmet KARAKAS. The user's profile is visible at the top left, showing the name and an 'Outstanding debt: 12.5%'. The main content area features a 'PAYMENT' modal form. The form has a title 'PAYMENT' and a subtitle '12.5'. Below the subtitle, there are three input fields: 'water expenses', 'mehmetkarakas', and a password field. A 'Pay' button is at the bottom of the form. The background is dark gray with a light gray sidebar on the left. The Windows taskbar is visible at the bottom.

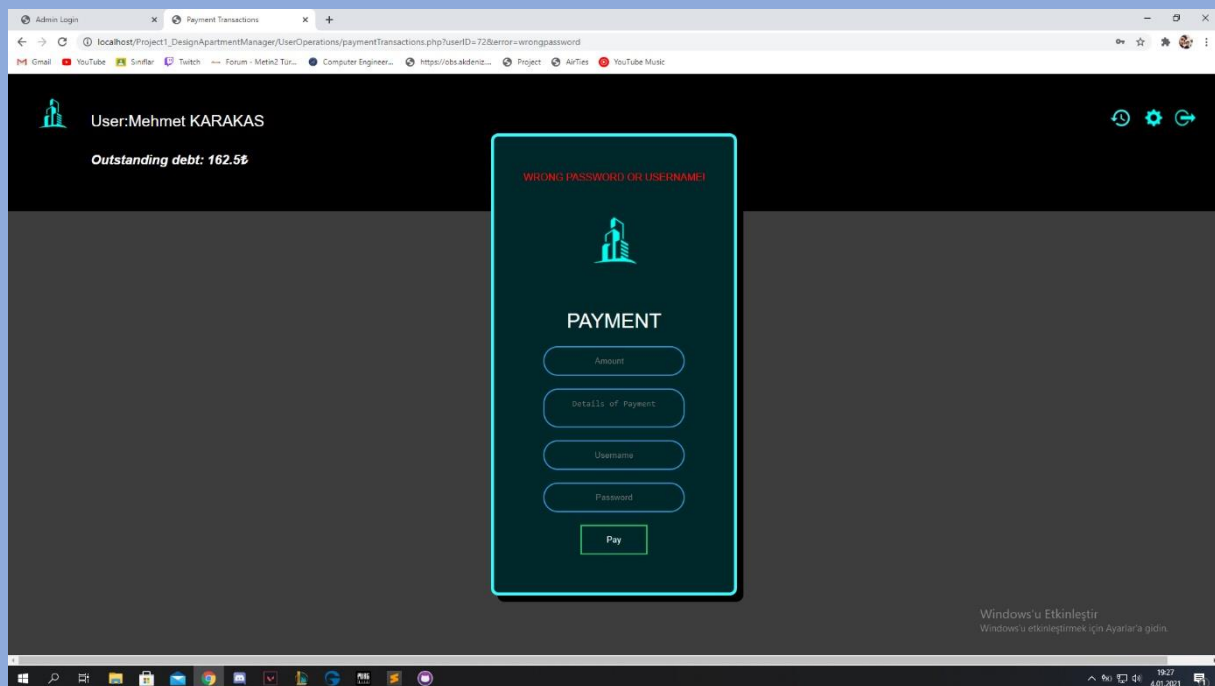

Residents can pay their debts, they can enter an amount to pay and its details. Also residents must enter their passwords and usernames to pay. Otherwise they can not pay their debts.

The screenshot shows the same web application interface as the previous one, but with an error message. The 'Outstanding debt' is now '162.5%'. The 'PAYMENT' modal form is still present, but the '12.5' value is replaced by '300'. A red error message box appears below the input field, stating 'Değer 162.5 veya daha küçük olmalıdır.' (Value must be 162.5 or smaller). The 'Pay' button is still visible at the bottom of the form. The background and sidebar are the same as in the previous screenshot.

The amount of the payment can not be higher than the debt of the resident. Also the amount can not be negative.

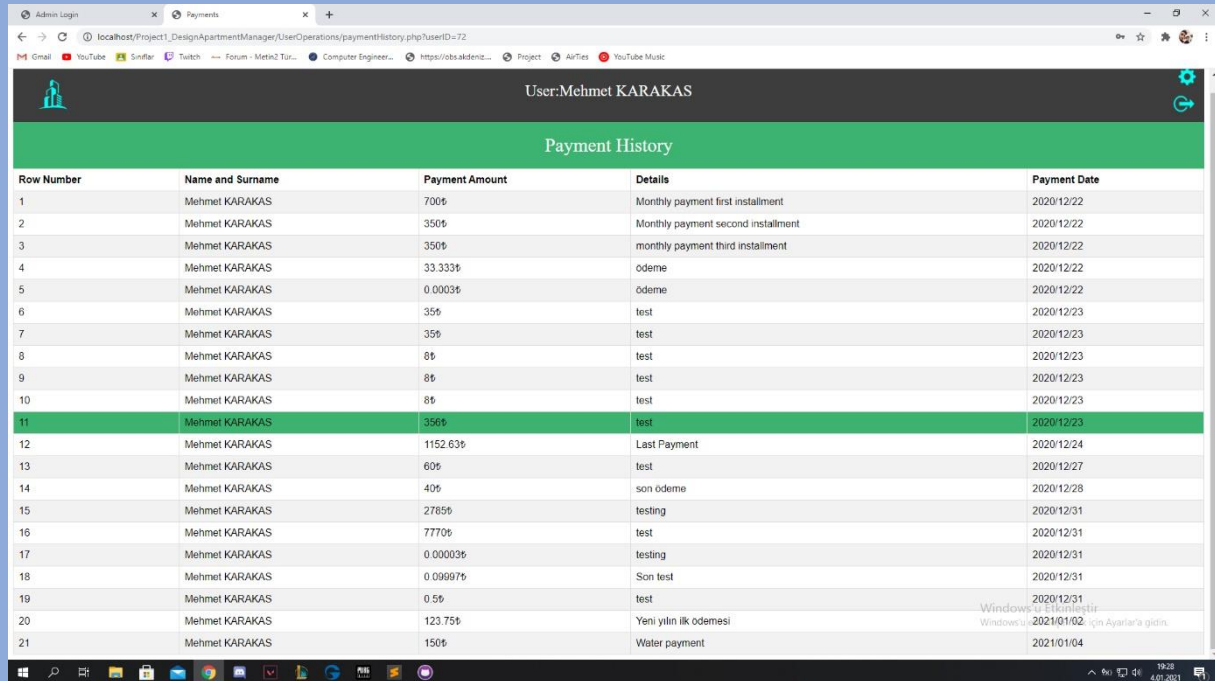

And if the payment completed successfully the resident will see a message like this and it's debts decreases dynamically.

If the password or username is not correct, the resident can not pay the debt and will see an error message like this.

In this page residents can see the payment history using the history button.

6-Residents can see the payment history.
